

Paper 14.75 - Boundary-Repair Curvature as Next-State Precondition

CQE-paper-14.75

CQECMPLX Formal Paper Series

Review-facing PDF built 2026-06-13

Construction Basis

This PDF is the clean paper artifact. Source extracts, kernels, receipts, tool notes, workbook material, and package bindings are used as construction evidence; they are not treated as separate review-facing papers.

Evidence Inputs

Paper 14.75 - Boundary-Repair Curvature as Next-State Precondition

Purpose

This bridge defines what Paper 15 may inherit from Paper 14.

Exported State

Paper 14 exports:

```
repair score
transport classification
proof boundary
zero-repair reference
curved-carrier receipt
open physical-GR boundary
```

Legal Use in Paper 15

Paper 15 may use repair score as:

```
mass-residue input
transport cost input
unresolved boundary payload
visible obligation carried forward
```

Paper 15 may not use Paper 14 as:

```
Einstein tensor proof
physical gravitational calibration
automatic Higgs or mass derivation
```

Recenter Rule

The next paper must recenter:

```
Paper 14 repair receipt -> Paper 15 requested enumeration event -> Paper 15 mass-residue claim
```

Paper 14's repair score is an input, not Paper 15's conclusion.

Hidden-Guess Diagnostic

Before using a Paper 14 row, classify it hidden:

```
zero repair, positive repair, physical obligation, or invalid overclaim
```

Then reveal the row and carry the classification into Paper 15.

Conclusion

Paper 14.75 lets later work inherit repair magnitude without inheriting unsupported physical claims. That is the bridge Paper 15 needs.
