

Paper 19.50 - Observer Face-Selection Claim Contract

CQE-paper-19.50

CQECMPLX Formal Paper Series

Review-facing PDF built 2026-06-13

Construction Basis

This PDF is the clean paper artifact. Source extracts, kernels, receipts, tool notes, workbook material, and package bindings are used as construction evidence; they are not treated as separate review-facing papers.

Evidence Inputs

Paper 19.50 - Observer Face-Selection Claim Contract

Purpose

This contract admits finite face-selection receipts and rejects observer overclaims.

Admitted Claims

Admit a claim when it provides:

```
selected face
latent faces
C recovery rule
Z4 face status
open observer residues
```

Rejected Promotions

Reject by default:

```
face selection -> consciousness proof
face selection -> physical collapse proof
Z4 template -> temporal Rule 30 period
open-gap route evidence -> completed observer theorem
latent face omitted from receipt
```

Hidden-Guess Rule

Diagnostics must hide the receipt until classification:

```
closed finite selection
closed invariant
bounded open-gap evidence
open interpretation
invalid overclaim
```

Linked Receipt

Current receipt:

```
production/formal-papers/CQE-paper-19/observer_face_selection_receipt.json
```

Current verdict:

```
finite face selection: pass
gluon antipode invariance: pass
static Z4 face template: pass
SPINOR observation: open
global observer theorem: open
```

Boundary Failure

The contract fails if a selected face deletes the unselected faces.

It passes if each unselected face is retained as an obligation with a recovery rule.

Conclusion

Paper 19.50 preserves the observer mechanism as accounting, not interpretation inflation.
