

Paper 24.75 - KnightForge Next-State Bridge

CQE-paper-24.75

CQECMPLX Formal Paper Series

Review-facing PDF built 2026-06-13

Construction Basis

This PDF is the clean paper artifact. Source extracts, kernels, receipts, tool notes, workbook material, and package bindings are used as construction evidence; they are not treated as separate review-facing papers.

Evidence Inputs

- top-level review source: Papers\Source\CQE-paper-24.75.md

Paper 24.75 - KnightForge Next-State Bridge

Bridge Role

Paper 24 exports a local-rule board automaton. The next state receives a way to turn board moves into replayable `(L, C, R)` rows with closure receipts. It does not receive solved games.

Exported Artifacts

The next state receives:

- finite board sweep order,
- local exclusion rows,
- occupied/rejected row accounting,
- L-conjugate anneal receipts,
- `2 + 6` sector labels,
- N-dimensional frame-operator boundary,
- invalid-promotion labels.

Use in Paper 25

Paper 25 may treat occupied moves, rejected moves, and frame labels as traversal cost rows. It must still prove its own energy or action ledger.

Use in Paper 28

Paper 28 may extend the board-local rule to broader game lattices. It must separate finite reachability proof from general game solvability.

Boundary

Paper 24 exports board-automata closure. It does not export chess closure, strategic optimality, OEIS identity, or N-dimensional playability.
