

# Paper 11.75 - Theory Admission as Next-State Precondition

CQE-paper-11.75

CQECMPLX Formal Paper Series

Review-facing PDF built 2026-06-12

## Construction Basis

This PDF is the clean paper artifact. Source extracts, kernels, receipts, tool notes, workbook material, and package bindings are used as construction evidence; they are not treated as separate review-facing papers.

## Evidence Inputs

- top-level review source: Papers\Source\CQE-paper-11.75.md

# Paper 11.75 - Theory Admission as Next-State Precondition

## Purpose

Paper 11.75 explains how the theory admission gate becomes a precondition for Paper 12 and later applied or external-theory papers.

## Exported State

Paper 11 exports:

```
T10-anchored admission predicate
trusted spectrum S_T10
K_max = 9
three outlet verdict set
declared encoder requirement
Pariah/Happy-Family boundary receipt
observer-center lineage
```

## Use in Paper 12

Paper 12 may use admitted, boundary, or rejected-as-datum candidates as inputs only if it preserves their gate receipt. Candidate data cannot be used as if it entered freely.

The allowed transition is:

```
admission receipt -> prediction surface input
```

The disallowed transition is:

```
external theory similarity -> prediction claim without gate receipt
```

## Use in Later Papers

Later papers may use Paper 11 for:

- external theory import,
- product/tool family admission,
- encoder-bound comparison,
- boundary-collision routing,
- rejected-as-datum obligation tracking,
- recentering audits.

Every use must name the gate outlet and receipt.

## Precondition Rule

Before a later paper uses Paper 11, it should be able to answer:

```
What candidate is being admitted?
What mass function or encoder is declared?
Is T10 attached?
Is the candidate inside K=9?
What gate outlet did it receive?
Which receipt proves the verdict?
```

## **Conclusion**

Paper 11.75 turns theory admission into portable state. It lets later papers use external candidates while preserving the center, trust anchor, boundary, and rejected-as-datum logic that made the admission honest.
