

Paper 19.75 - Observer Face-Selection Next-State Bridge

CQE-paper-19.75

CQECMPLX Formal Paper Series

Review-facing PDF built 2026-06-12

Construction Basis

This PDF is the clean paper artifact. Source extracts, kernels, receipts, tool notes, workbook material, and package bindings are used as construction evidence; they are not treated as separate review-facing papers.

Evidence Inputs

- top-level review source: Papers\Source\CQE-paper-19.75.md

Paper 19.75 - Observer Face-Selection Next-State Bridge

Purpose

This bridge exports Paper 19 to Paper 20 as ledger-ready accounting.

Exported State

Paper 19 exports:

```
selected face
three latent faces
C as antipodal recovery coordinate
static Z4 face classification
bounded observer-route evidence
open SPINOR residue
open physical observer interpretation
```

Legal Use In Paper 20

Paper 20 may ledger every observation as:

```
selected face row
latent face rows
open residue row
```

Illegal Use

Do not write:

```
Paper 19 proves consciousness.
Paper 19 proves physical collapse.
Paper 19 observed SPINOR.
Paper 19 allows latent faces to be discarded.
```

Recenter Rule

For a later claim, set:

```
C = selected observer face
B = finite/bounded/global boundary
T = face-selection transform
O = latent faces and unclosed interpretations
```

Hidden-Guess Diagnostic

Before revealing the next-state receipt, classify whether the row is closed, bounded with open gaps, open, or invalid.

Conclusion

Paper 19.75 sends observer face-selection forward as a ledger discipline: observe one face, keep the rest visible.
